

KORE EOOD

Information Security Policy Statement

The Information Security Management System supports the protection of sensitive information for both KORE EOOD and its clients during the provision of High Availability Hosting Solutions. The management system scope includes all operations within the company's office for the consultancy, design, development, implementation, management, support and delivery of High Availability Hosting Solutions. In accordance with the company Statement of Applicability Version 1.0

KORE is committed to comply with applicable legal requirements and with other requirements which relate to the confidentiality, integrity and availability of its activities, products and services. We are committed to reduce the risk with the relation to operational, physical and system security by continually improving data security performance with reviewed data security objectives and key performance indicators through the Information Security System Management framework.

Director

A handwritten signature in black ink, appearing to read "Stefan Yovchev", is written over a light blue horizontal line.
